PROFILE

Product and interface designer who takes ideas all the way to working software. Trained as a painter and working as a musician, I bring composition, rhythm and restraint to interfaces — and I build them myself, in React, Next.js and SwiftUI. I design clear states for complex flows, from AI-assisted review to payments, and ship them as live, testable products.

SELECTED WORK 2026

AbletonR — Ableton web redesign — UI system · Next.js, React, TypeScript

Independent redesign of Ableton's website centred on Session View. Designed and built a multi-route site — product pages, a visual Packs archive and a shop with persistent cart — each route with its own density and interaction model.

ableton-r.vercel.app · case study on portfolio

Pardon — local-first AI assistant for iPhone — iOS · SwiftUI, Foundation Models

Designed and built a native chat app where text, live dictation and files share one composer. Every system limit — permissions, model availability, context size — has an explicit interface state. Available on TestFlight.

FundLife — AI document review workspace — Product design · Figma

End-to-end flow for resolving an AI-flagged conflict between fund documents: source comparison, accept / edit / reject, recoverable history and partner handoff. Figma system with 52 variables and 5 component families (29 variants).

Base — AI visual library — Applied AI · JavaScript, CLIP, Supabase

Search across 4,754 images by text, reference image or visual similarity, with in-browser inference and invitation-based access.

BioDiscovery Workbench — Data engineering · Python, React, Mol*

Scientific explorer linking protein structure, bioactivity evidence and source provenance (UniProt, PDB, ChEMBL); 16 automated tests.

TrustPay — payment backend — Backend · Java 21, Spring Boot, PostgreSQL

Idempotent payments, balanced ledger, transactional outbox and crash recovery; 19 integration tests and a public demo.

EARLIER EXPERIENCE

Customer Support — Airbnb — Telus International, Sofia · 2021–2022

Sales Consultant & interior layouts — Galero furniture · 2007–2016

Planned client interiors in AutoCAD and ArchiCAD.

Graphic Designer — Amperel · 2006–2007

Advertising, brochures, banners, print and digital graphics.

SKILLS

Design — product & interaction design, UI systems, visual design, prototyping, accessibility

Tools — Figma, Illustrator, Photoshop, Xcode, Git, Vercel

Front-end — React, Next.js, TypeScript, JavaScript, HTML, CSS, SwiftUI

Also — Java / Spring Boot, Python, PostgreSQL; AI-assisted development (Claude Code, Codex)

EDUCATION

National Art High School "Tsanko Lavrenov"
Painting, design, graphics & sculpture

Google UX Design Certificate — Coursera

Languages — Bulgarian (native), English (B2)

University of National and World Economy
B.A. Business Administration

QA Software Testing — SoftUni
